SUMMARY

Passionate and hands-on Computer Engineering graduate currently pursuing PG-DAC from CDAC Bangalore. Experienced in full-stack development with projects spanning web apps, Android applications, and Google Workspace automation. Proficient in Java, C++, JavaScript, React, Node.js, and Spring Boot with a strong command over MySQL and MongoDB. Delivered real-world solutions like an Online Recruitment System, E-commerce platforms, and Smart Attendance Systems. Strong problem-solving skills, certified in Python, Cloud, IoT, and Full Stack Development. Quick learner with a proven ability to work in teams and deliver on deadlines.

EDUCATION

Post Graduate Diploma in Advanced Computing

C-DAC ACTS Bangalore • Bangalore • , Karnataka

February 2025 - Present

Diploma in Computer Technology

Government Polytechnic Ahmednagar • Ahmednagar • , Maharashtra

August 2018 - 2021

Percentage 89.20%

Bachelor of Technology in Computer Engineering

St. Vincent Pallotti College of Engineering & Technology • Nagpur, Maharashtra

December 2021 – 2024

CGPA 7.92

EXPERIENCE

Web Development Trainee

RB Tech Services, Ahmednagar

Jun 2020 – Jul 2020

- During the training period I have successfully completed a life project within deadline.
- Project was based on a web based life application which is a Notice management system.
- Analyzed problems and worked with teams to develop solutions

Software Development Intern

SRS Infosystems Pvt. Ltd.

Jul 2023 – Aug 2023

Dec 2023 - Apr 2024

- Design, develop, and enhance custom applications using Google Apps Script to streamline business processes and improve workflow efficiency within the Google Workspace ecosystem.
- Integrate Google Apps Script with Google Workspace APIs, including Google Sheets, Google Drive, Gmail, Google Calendar, and other relevant APIs to enable data synchronization and automation across different services.
- Developed a fully dynamic e-commerce website for parshwa acrylics in this project we have used apps script API and AWS S3 S3 bucket this website is designed in HTML CSS bootstrap JavaScript PHP .
- I have used S3 bucket to push the base 64 image and get a compressed path of image .This website is fully responsive. Any user can use this website from any devices like mobile phone, tab desktop and other.

PROJECTS

Apps Script Projects

TeamOB Time Based Trigger (ESSL - Automation)

- In this project I have created an attendance management system for hostels .
- This project is going to manage the attendants of hostel student and trigger a query at a fixed time when the gate is close number of students are outside will get a message as well as their parents also get a message that your children are outside and warden will get the list of student who are currently outside after get closing time

Web Development

Online Recruitment System

- Built a web-based platform to manage complete recruitment lifecycle.
- Features: Job posting, resume upload/filtering, interview scheduling, offer management.
- Developed using Java Spring Boot, MySQL, ReactJS.
- Ensured responsive UI, secure login, and modular architecture.

Parshwa Acrylics E-Commerce Project

- Led the creation of a responsive e-commerce site for Parshwa Acrylics using HTML, CSS, Bootstrap, JavaScript, and PHP, ensuring compatibility across all devices.
- Implemented Google Apps Script API and AWS S3 for dynamic content management and optimized image handling, significantly enhancing site performance and user experience.

Notice Management System

- In this project I have created a notice management system for college in which the admin can post the notice and others can see the notice. To develop this we have used HTML, CSS, PHP, MySQL

Android Apps

Travel Buddy

- This project is a prototype of an Android application in which users can get the best hotel nearby, visiting places and also can book cab and flight tickets made using Android studio , java and google in build apis

Geo-Fencing and WiFi Based Attendance System

- We Developed an innovative attendance system leveraging geo-fencing and Wi-Fi technologies to enhance accuracy and efficiency in attendance tracking across corporate environments.
- This project is an industrious project. It is developed for integrating with industry pre-built software. In this project I have used the technology like react native mongo DBMS Android studio postman for API testing.
- In this project we have also created our own API using PHP in this API to help fetching data or posting data form database.

SKILLS

Programming Languages: C, C++, Java, JavaScript, SQL

Web Technologies: HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX, React.js, Node.js, Express.js

Database Languages: SQL, MongoDB

Frameworks & Tools: Spring Boot, Hibernate,

Tools and Technologies: , Version Control, AWS, Ubuntu server , VSCode, LaTeX, Postman, ChatGPT, Canva

Industry Knowledge: Project Management, Web Development (HTML, CSS, BOOTSTRAP) , Mobile Application Development

Other Skills: Linux, Shell Scripting, Agile, SDLC, Manual & Automation Testing, AWS (S3), Google Apps Script

Interpersonal Skills: Team Management, Problem Solving.

CERTIFICATIONS

Introduction to Python Programming , University of Pennsylvania	Feb 2022
Deep Learning , IIT Ropar	Nov 2023
Introduction to IoT , Simplilearn	May 2023
Learn Java , CodeChef	Aug 2023
Learn SQL , CodeChef	Aug 2023
CLOUD COMPUTING , IIT Kharagpur	APR 2024
FULL STACK DEVELOPMENT WITH REACT & NODE JS , GeeksforGeeks	May 2024
Full Stack Java Developer , simplilearn	April 2025

EXTRA CURRICULAR

Third Place in EncipherX CTF

Certificate Link:- https://drive.google.com/file/d/11RDGt73CdCDee5uC_ETZsMwguH7QC66N/view?usp=drive_link

March 2022

International conference on Technology Innovation & Application In Industry 4.0

Research Paper on “How Can Companies Utilize Generative AI For Operations”
