EDUCATION

Madan Mohan Malaviya University of Technology, Gorakhpur
B.Tech-Computer Science and Engineering

August 2019 - September 2023

EXPERIENCE/INTERNSHIP

Intern at OrgLens: Software Development | [Link](#)

July 2024 - December 2024

Tech used: HTML | CSS | **Javascript** | **React.js** | Bootstrap | **Git** | **Github** | **REST APIs** | Browser Developer Tools

- Converted Figma designs into **responsive** web pages, developed modular **React components**, and optimized mobile compatibility using Bootstrap, achieving full design alignment and a 30% improvement in mobile compatibility.
- Improved user experience by **reducing page load times** by 20% through **lazy-loading** and enhancing authentication success rates by 15% with secure **sign-in/sign-up** pages and **REST API** integrations.
- Boosted team productivity by 25% through active participation in **agile practices**, effective **debugging**, and using Git for **version control**.

PROJECTS

E-Commerce Platform Development: [GitHub](#)

June 2023 - September 2023

Tech used: **React.js** | MongoDB | Node.js | Express.js | JWT | Postman | Bootstrap | HTML | CSS | Javascript | **Git**

- Developed a **secure** e-commerce platform with **JWT authentication**, advanced **product filtering**, **responsive** design, and **pagination**, reducing unauthorized access by 20% and boosting product discovery.
- Implemented role-based access, **profile/cart management**, **error handling**, and an **admin dashboard**, enhancing platform functionality and improving retention by 20%.
- Optimized **navigation** and reduced load times by 40%, increasing efficiency and improving user experience.

Movie & TV Show Aggregator: [Live](#) | [GitHub](#)

November 2022 - December 2022

Tech used: HTML | CSS | **Javascript** | **React.js** | Redux | **TMBD API** | Figma

- Built a **responsive** platform using **TMDB API** with features like **lazy loading**, infinite scroll, **advanced search bar**, and **live trailer** playback, reducing bounce rates by 25%.
- Improved mobile responsiveness, increasing traffic and conversions by 20%.
- Optimized platform performance with **Axios** for API handling, enabling personalized **recommendations** and boosting user engagement by 30%.

SKILLS

Strong Area: C | C++ | **Data Structures and Algorithms** | Software Development

Technical: HTML | CSS | JavaScript | TypeScript | React.js | **Node.js** | **Express.js** | **MongoDB**

Miscellaneous: Git | Github | Redux | **Firebase** | REST API | Bootstrap | Tailwind CSS | jQuery | JSON | UI/UX

Curriculum: **Database Management System** | Operating System | Computer Networks

ACHIEVEMENTS / CERTIFICATES

- Solved more than **900+** **online coding questions** on various online coding platforms.
- Hacker Rank: [Link](#) | Winner of **Chess** Tournament (twice) Highest Rating = 810.
- Tech Talk **Hackathon:** [Link](#) | Certified by HackeRank in CSS [Link](#) | JavaScript (Intermediate)

POSITION OF RESPONSIBILITY

Technical Head at IICHE Society | NCC Cadet

April 2020 - August 2022
